EDUCATION

Jomo Kenyatta University of Agriculture and Technology

Juja, Kenya

Bsc Geomatics Engineering and Geospatial Information Systems

June 2024

PROFESSIONAL EXPERIENCE

Shamiri Institute

Nairobi, Kenya

Data and Tech Lead, Research

January 2026 – Present

- Cleaned and validated research datasets across mental health programs at Shamiri, reducing data errors by 98% and ensuring analysis-ready data for program evaluation cycles.
- Documented and tracked all deviations from research protocols in a structured deviation log, enabling the research team to maintain compliance standards and providing an auditable record of study integrity throughout data collection.
- Monitored and evaluated program data on an ongoing basis against predefined indicators, surfacing trends and anomalies that informed timely corrective actions and strengthened the reliability of study outcomes.
- Synthesized M&E findings into structured reports for internal research leads, translating cleaned dataset outputs into actionable insights that guided decision-making on mental health intervention delivery and program adjustments.

Debi Consulting Limited

Nairobi, Kenya

Research Assistant

June 2025 – July 2025

- Trained field enumerators on KoBoCollect data collection procedures for the Imarisha Msichana end-point survey, equipping 12 enumerators with the technical skills needed to capture consistent, high quality data across all field sites.
- Facilitated Focus Group Discussions and key informant interviews in collaboration with the Research Manager, generating rich qualitative data that complemented quantitative survey findings for a comprehensive program evaluation.
- Developed Python and R scripts to clean, process, and structure research datasets from KoBoCollect and REDCap into structured analytical workflows that supported program reporting and strategic planning.

Geosolution International Limited

Nairobi, Kenya

GIS Analyst

June 2024 – Dec 2025

- Developed Python and PyQGIS scripts to automate spatial data processing and analysis workflows. Significantly reducing manual geospatial processing time and improving consistency of outputs across projects.
- Wrote and maintained geospatial analysis scripts using Python and R to process, model, and visualize spatial data, supporting geographic targeting and mapping of program interventions across study areas..
- Build and Presented dashboards to multiple clients, communicating technical spatial and non-spatial analysis in accessible terms and supporting clients in interpreting results for research documentation and strategic decision-making.

SKILLS

Technical: Excel, R, python, QGIS, JavaScript, HTML, CSS, PowerBI

Hard skills: Predictive modeling, geospatial analysis, data visualization

Languages: English (proficient), Swahili (native)

OTHER CERTIFICATIONS AND TRAINING PROGRAM PARTICIPATION

Data Science, LuxDev Hq, Kenya

2026
